Whispers from The Brighter World

Wednesday, February 6, 2013 – 10:00 a.m.

Life is not a bed of roses; it is nourished by a continuous and essential movement. That is the way this world is governed, with its many characteristic features. Taking these into account, we act accordingly to transform into positive energy that which is not necessarily positive and does not initially lend itself to a far-reaching mutation.

We gradually lead our abhyasis, those who are willing to follow us, to a state of openness of their psychic centres and to a suitable inner disposition. In the course of their approach, the world of the Spirit gradually becomes a reality and an absolute necessity for them; the most committed ones know what we are talking about. The way opens before them, and they are imperceptibly led to shores where the notion of spirituality takes on another meaning. It is no longer an abstract word whose meaning eludes them; in certain circumstances they are led to have significant experiences, especially in seminars where the Masters' birth anniversaries are honoured. Our way has more than one resource – it offers distinctive features. Each one of our brothers and sisters makes their own discoveries; these are part of their personal journey.

Spiritual life, in its many manifestations, is and will remain the true wealth of the human being.

Our abhyasis are on their way, appropriately supported by our constant blessings.
