Whispers from The Brighter World

Tuesday, February 12, 2013 – 10:00 a.m.

The most important feature in this symbol is the point of light in its centre; it is appealing in many respects. By including it in their practice, our abhyasis – over time – will experience it. It's up to each one to discover the effects it can generate in regular practice. After so many years, it is beginning to attract attention; the hidden meaning of the various elements will be revealed to abhyasis once they give minimal attention to what it represents.

An esoteric symbol always has a hidden meaning – that is precisely what characterises it. Going beyond appearances and truly interiorising oneself will bring suitable answers to such an approach. It is not about attractive elements; they have a deep meaning. Sufficient interiorisation will provide seekers with the desired answers.

Our abhyasis will feel more and more involved with this symbol. It was given a very long time ago and only now does it arouse some interest. This is how it goes, one might say. It all takes place slowly in a world where laws are inescapable; we cannot currently change anything in this area.

In the future, a new orientation of the planets will give rise to a movement of global acceleration. Then, in many areas, everything in the general organisation of life will be reconsidered on all levels. The preparation of such changes takes place very slowly on Earth; its pace is slow, being included in an overall movement. Doesn't everything have its raison d'être? That is not our area of responsibility; we can

only adapt and – precisely here in this field of spirituality – transcend the laws of materiality. Our focus is elsewhere; it is essential for all of us.

Blessings to all, and particularly to those who are nourished by these messages. May these messages open up wide horizons to them according to their personal aspirations.
