Whispers from The Brighter World

Saturday, February 16, 2013 - 10:00 a.m.

You gaze at the centre point of the symbol and you join us in spirit. You have internalised this principle. One day it will become more widely understood and used by all our aspirants. It takes a lot of time in this world for that reality to be perceived humanly. This objective will take on its true meaning in the future when another level of consciousness is achieved. We cannot force anything; we propose, and everyone disposes at their convenience. What matters is that all our brothers and sisters be on their way and assimilate as best as possible what we propose to them.

"In a way such as ours, the psychic centres of the being are refined. They also become stronger through the need to develop within them that which is important in an active spiritual process that is responsive to the call of the Divine. We strive to ensure that the aspirations of all are met. A new era is dawning on the horizon of this evolutionary process. As far as we are concerned, everything will be implemented in a timely manner to meet all spiritual needs.

"We do not have a magic key. What we propose is not a dream or impossible; we only propose what is important for all those who are eager for a real journey in this area.

"We remain optimistic in the face of increasing material difficulties; tomorrow's humanity can only grow and open up to a higher reality.

"These messages are designed to take one further in the method we propose. They provide some elements to aid the abhyasi in understanding phenomena.

"May all our brothers and sisters grow and free themselves as much as possible from the miasmas of this material world.

"Blessings to all."
