Whispers from The Brighter World

Tuesday, February 26, 2013 — 10:00 a.m.

The essence of life is divine; it brings forth creation on the material plane. Who in this world really understands the subtlety of this reality! In truth, everything is simple. Man often complicates things beyond measure. Life is one and manifold; certain phenomena are strikingly true, and their greatness is beyond human comprehension. Nonetheless, minds are opening up and this process will increase more and more over time.

"It is justified that man advances in knowledge — a knowledge that has been hidden since time immemorial, hidden for many reasons including the incessant hatred between peoples and an ignorance of the truth. Violence still exists. It is high time to understand and overcome this heaviness that has been maintained for various reasons, including power.

"Man is incorrigible; moving towards good is not, by and large, his priority. Beyond his person, his ethnic group and his personal convictions, there are divine laws that are constantly breached because they are not respected. How can humanity make progress in this context! It is desirable that it turn to reality and true knowledge in order to evolve.

"A spiritual way like ours goes in this direction. As he rises to this level, man opens up to an understanding of the phenomena that govern this world and that are not currently revealed to the vast majority. True initiates transcend the pervading heaviness in order to grasp a truth that can transform their Earthly existence and lead them to reality. Many achieve it, and we are working accordingly.

"We cannot explain everything here; it is up to each one to truly advance, devote themselves to steadfast practice and overcome ignorance in order to discover the truth, with the help of our endless blessings."
