Whispers from The Brighter World

Sunday, March 24, 2013 – 10:00 a.m.

This long epic of messages will have allowed us to touch upon many topics with the aim of helping our brother and sister abhyasis. Blessed are those who benefit and who appreciate them in their simplicity. It is only an apparent simplicity; pure hearts find in the messages a subtle nourishment according to what they can absorb. This has always been the goal of this special transmission, intended for beings who are receptive and sufficiently open. This rather special kind of communication will be more valued in the future. The Great Beings of the past who influenced humanity in this field of the Spirit have used it, although this has not been revealed. Here, we express ourselves clearly: the time has come in history when this aspect of life should no longer be neglected. This method may still shock and disturb some people. Misuse of this means of communication is unfortunately commonplace.

Being often misused, used by those who are unscrupulous or convinced of the veracity of what they receive, this process is not understood or accepted by all. We too have experienced this among those most trustworthy within the Sahaj Marg Mission. All the Great Beings of the past who left their mark in history were inspired in this way and enlightened in many circumstances when necessary. All this is to be considered here. We see only the good of this action in the hearts; isn't that the main thing? The future will clarify things in many areas; the world is evolving slowly. Such is life here below, at this stage of its evolution.

Let us look beyond – to the Mission's progress and to the good it provides within each of our brothers and sisters. That is the noble goal, whose action is supported by the higher powers.

This is how it is.
