Whispers from The Brighter World

Wednesday, March 27, 2013 – 10:00 a.m.

It is not easy to stop after so many years of productive contacts. There are many resources in these thousands of pages that have accumulated and that are yet unknown to our brothers and sisters. They will be more than enough to satisfy those who appreciate them. They will still have to discover some specific messages. Not everything has been said yet, as far as previous publications are concerned. Time will gradually deliver all of these writings.

In this way, we will have given all that is possible within the framework of current knowledge.

What is essential is there. From now on, it remains for our abhyasis to continue their personal work, plus, if they wish, the reading of these messages. They can only help them – have they not always been given for this purpose! Blessed are those who appreciate these messages. This reading is a blessing for them, by divine grace and owing to the great wisdom of their Master who, from the outset, knew how to recognise the value of these writings.

May all be blessed and strengthened, especially in this.

Babuji
