Beloved Master
Revered Babuji Maharaj

Whispers from The Brighter World

Saturday, July 27, 2013 – 10:00 a.m.

Birth anniversaries are very important moments in our Mission. Each of them has specific characteristics and they complement each other in the work we are doing. The living Master has this privilege: he operates at the level of matter, differently. Each of our actions fits into a whole, being a major asset for the Mission's extension and for the concentration of energies we use upon the entirety of this beautiful spiritual community. In this area, the Mission brings what is suitable for this era of transition, when people who have reached sufficient maturity can begin a truly appropriate work. The call is great and it is heard by beautiful souls in search of a true path that culminates in mergence with the Ultimate. The journey is not easy; it requires some effort, appropriate discipline and sufficient openness of heart. A refined humanity is on the horizon; it won't be so simple to alleviate humankind's multifarious sufferings and the prevailing negativity.

Many souls are in need; they thirst for the Divine, though not all of them are actually aware of it. Everything in its time – to the higher powers nothing is impossible. One day, humanity will elevate its status and turn to a promising future. Isn't that the purpose of our action here below!
