Whispers from The Brighter World

Thursday August 1, 2013 — 9:30 a.m.

Let people do and say as they please, the bothersome and annoying people remain so wherever they are. Our history related to the messages is beyond measure compared to these pitiful gossips. It has always been so: whatever one does here below, they are exposed to criticism. Were the greatest spiritual Masters not subjected to criticism! That is the nature of this world, hence the need to see only the good, the great, that which is being built for the Sahaj Marg Mission. This Mission will leave its mark on present times and take on an important place in the future. Our abhyasis should be convinced of this: they are on the right path, that which truly uplifts the being. Is it not the real purpose of a spiritual journey? Its action generates results — whether they are visible or not, they transform beings even if, on the human plane, some specifically human tendencies persist. Miracles are not always visible. We do not have a magic wand, but what is being accomplished in this beautiful Sahaj Marg Mission is great and will leave its mark on this time. Why not repeat it — humans always need certitudes. In our system, miracles take place behind the scenes; they may not be monumental events, but they do exist, believe me. The important thing is to love, to act accordingly and to move towards the ultimate peace, where beautiful souls find delight. Anything is possible under our blessings, with the grace of the Masters."
