Whispers from The Brighter World

Friday, January 31, 2014 – 10:00 a.m.

Do not mind repetitions – they are important; how many of our abhyasis have read all of these printed messages! Isn't everything constantly repeated in this world! Human beings have been developing with respect to this principle since ancient times; this is how it is. Here lies the very basis of education and life. Over the years, we see our aspirants changing; the most convinced and faithful make real headway, with quite spectacular results. How could we not give the maximum? Everything possible must be done to help the entire Mission.

This highly agitated life – troubled at all levels by such pollution as humans cannot imagine and history has never seen – is very destabilising for humanity. The consequences of these many and varied excesses will no doubt cost dearly. What more can we do to encourage humans to grow spiritually? This notion is so little known. Happy are those who adhere to these principles; their personal commitment bears fruit of great importance. To elevate oneself in this way gains valuable time; it is running short for each and every person.

May our way of the heart help more and more people; there is such distress manifesting here below, and this will only become more pronounced in the years to come.

The refuge of faith, of one's work to refine oneself and to understand the real subtleties of life, is a very precious asset that will be proven true over time. Blessings to all.
