My Beloved Master
Revered Babuji Maharaj

Whispers from The Brighter World

Sunday, February 9, 2014 — 10:00 a.m.

Every step taken in a state of surrender, strengthened by unfailing steadfastness, allows one to bear things — as you are doing so well for the love of us. As you know, these messages are highly valued by fervent hearts that are sufficiently open to the specific energy conveyed therein. Your Master, in his greatness, has exercised his good judgement in recognising their true worth. That is the characteristic feature of beings who are highly vested by the Divine, as is the case for his noble person.

"Everything on Earth takes place slowly; this pace is aligned with its power of attraction. The various worlds are highly diverse. Just like human beings, each world has characteristics that are appropriate to its needs. Creation is a whole, and each element provides what is needed for the general balance; the same is true in our Mission. Diversity forms a whole, serving the same purpose and cause, with respect to human evolution. All this is very complex. We will not dwell on details that go beyond the simple and effective approach that we propose — one that serves the greater good of all beings who trust us and follow us on this highly promising path. Life is one and indivisible; what it fosters at this level is highly effective and rich in results, believe me. Here, we can assess what those effects produce on the whole Mission. Dissident movements will not endure, and the same is true for the creations of the ego, with which some people are satisfied — for the wrong reasons. We know you all, and we are not mistaken: only the pure in heart will see the light; everything is counted, believe me. Blessings."
