Whispers from The Brighter World

Wednesday, February 12, 2014 — 10:00 a.m.

All these testimonies emanating from abhyasis near and far, are they not moving to our scribe! After all these years of transmission at this level, the result is very positive, and we are happy. As we have said many times, these messages are a very precious asset for our Mission. Everyone can find in them that which they need on a daily basis, and they are given the answers they require. Increasingly, these writings will become the strong point of our Mission, supporting the outstanding work of the incarnate Master. Time will demonstrate more and more the importance of what is stated herein; this Mission, blessed by the chosen ones, is a true spiritual treasure, one that is so necessary here below in this world that is — in so many respects — in disarray. The limits of morality have largely been exceeded. Most human beings have no bearings; for them, what is meant by the words faith, love, surrender. This observation is very sad, and unfortunately we cannot change everything, despite the best of intentions and an action that is in many respects effective. All the great civilisations of the past, some of which disappeared in a dramatic fashion, experienced this irreversible degradation; progress can be dreadful if certain limits are exceeded. May our abhyasis rest assured that all is well for them with regard to what is essential for their journey and their spiritual growth. Following a path such as this saves valuable time. May all be comforted and strengthened on their personal journey."
