(Question from F.)

The work of your Master is his own business. What good would it do you all to know the why and how of things?
You benefit from it, the world benefits from it, isn't that the main thing?

You are not in the situation, so what is the point of explaining to you the details, the modalities, the reasons for what he does, the results he achieves. That is his business. You do not have the capacity to understand the subtlety of his action. We don't take you for simpletons, but this is an area where your knowledge and your view of creation are fairly limited.

This is how it is; trust him, your Master will travel as much as he can for your good. He is not satisfying a desire for travel, he is rather saturated in this respect, but he is doing what he came to Earth for, to serve humanity, and he is doing it well.

Benefit from him as much as possible, that is our advice to you.

His presence in your country is important, even if we cannot give you explanations. Take it as a great blessing for you all.

The world is in a bad way; so far you are very quiet in France. You don't even value this situation at its true worth. Make the most of it and make good use of your Master, who is giving his life for you – that is, all his strength – to accomplish an enormous work.

Know this well.
