Whispers from The Brighter World

Tuesday, February 18, 2014 — 10:00 a.m.

Through these messages, we are infusing love — this energy that is so mysterious to humans and which, by divine grace, very often allows for significant accomplishments. Masters of the past have done the same; such principles are perpetuated according to the higher will.

"Doesn't everything have its raison d'être, even those things that are not necessarily consistent with human projects and intentions? Divine purposes are beyond human understanding. For most people, these matters are elusive. It is often better not to try to understand, but to move forward against all odds in a state of surrender, as we advise our brothers and sisters who are eager to progress according to their wishes. Nothing is simple, and in this world there is no true ease; the Earth is a place of redemption where nothing is learned effortlessly. Many hopes are dashed, but some may come true, thus meeting expectations that had been abandoned.

"You may think that this is not of much help since the principle of life on Earth is not one of ease; there is constant turbulence disturbing everyone's life. This world is not about to change with regard to the principles by with this world evolves, as this planet is also subjected to numerous disturbances. The same energies operate at all levels, from the most minute to the most expansive. Each planet is part of the Great Whole, the whole of creation, and each still holds many discoveries for humans. People believe they know everything, but they know so little, being deluded at every instant by this world of illusion. One day, they will advance in true knowledge and their horizon will brighten. It takes time to accomplish what is necessary. This is how it goes. Blessings."
