Whispers from The Brighter World

Tuesday, March 4, 2014 — 10:00 a.m.

Moving towards the goal, as confidently and serenely as is possible in this world, is a strength and demonstrates a deep aspiration to reach the goal. Once a soul is thus committed, it does not turn back. No matter what happens, its motivation remains the same and increasingly expresses itself over time. Some of our abhyasis take breaks and come back later, more motivated than ever; certain experiences lead them to better understand the subtleties of this approach, whose group gatherings are simple and low-key. The important thing is to grasp the effectiveness of the system. The work is done gradually, earning 'points', you might say, and leaving an indelible mark on this sacred organ. Is the heart not the seat of the soul? This discovery is striking; by going deeply into the laws related to it, the truth is gradually revealed to human consciousness.

"Human beings are a mystery unto themselves. Science is making progress, but the time has not yet come for the truth to be revealed to humans in its entirety. Everything is much more subtle than it seems. The great mystics of the past already knew that which has not yet been revealed to human beings of today. Everything in its own time; if people probe too deeply into the truth — at their current stage of evolution — it might rebound against them. One day, many sites that are very well known on this Earth will reveal aspects about which today's humans have no idea. Material progress is not everything. That which is essential is yet to come; one day the truth will unfold to humans and then they will take a big step. Many beings on Earth have reached a satisfactory level of elevation, allowing them to address these

issues with great lucidity. To progress in one's knowledge through spiritual advancement is the best way to transform one's life in a positive manner. May all be motivated and sufficiently interiorised, so that one day the divine goal will be achieved."
