Beloved Master
Revered Babuji Maharaj

Whispers from The Brighter World

Sunday, March 16, 2014 –10:00 a.m.

We will revisit all the aspects concerning our Mission – our abhyasis must be aware of these, as they constitute, in and of themselves, a whole that is promising for the future of the Mission and its expansion. The next and fourth spiritual Master, as mentioned previously, will be part of this promising plan. Everything must be clear to our abhyasis: the incarnate Masters are all servants of the divine powers, working for a great and beautiful cause that will leave its mark on humanity. A great deal of perseverance is required to achieve what must be.

Times are changing. As we have said in a previous message, this highly blessed site of Hyderabad will become the high place of Sahaj Marg, the centre point of all our energies in the service of Divinity. This site will be the consecration of our beautiful path, special in its principle, which truly provides committed abhyasis with a real approach to the Divine. It takes quite some time here below for things to become clearer; each Master has brought to this Mission what was appropriate for his time. The future will definitively shape what is to be. All of us here are working to bring about these times to come, when our path will be included in a system very promising in its effects. Everything is slow on Earth and is strengthened over time through many difficulties, but positive results ensue, when such is the wish of a hierarchy that is oh so deeply involved. This desired growth is very dear to our hearts. The spiritual Masters, incarnate or not, participate in this vast project with determination. This world deserves to

move forward; many souls sincerely yearn for it, and we cannot but participate in a meaningful way. With all the love possible, under our blessings.

Babuji
