Whispers from The Brighter World

Wednesday, March 19, 2014 — 10:00 a.m.

We have given a series of messages clarifying the situation of our Mission as it will be in the future. The circulation of these messages will be edifying for all our abhyasis. Sahaj Marg is truly privileged; many spiritual ways or religions had only one Master, and in spite of that they are renowned in the world. In a half-century, Sahaj Marg has won over many hearts across all continents. The means of communication have changed, and information flows practically in real time, owing to all the powerful media that greatly benefit these messages and our entire Mission. Overall, the progress is amazing. Many humans are involved in our Mission to varying degrees, but all benefit from our incessant action. Everyone deserves the best. Souls follow this way of the heart that has multiple effects and meets their deepest yearnings.

"In this system, everything takes place discreetly and in silence, hence the need for sufficient interiorisation and quiet, which is especially valued in group meditations. In these meditations, a collective action enhances the effects of our transmission. It is not easy in this world of madness to secure moments of calm and silence that can lead the being onward to the desired vibrational planes.

"All are doing their utmost for the best to be accomplished, particularly those who are in charge. We are working towards an overall elevation of consciousness. At this level of action, nothing — not even the slightest detail — is futile or ignored, and no one's action escapes us. As we have already said, everything is recorded. May all our abhyasis continue to advance, ennobling this way that is so effective for the common good. May all act for the good of the entire Mission, under our blessings."
