Beloved Master
Revered Babuji Maharaj

Whispers from The Brighter World

Saturday, March 29, 2014 – 10:00 a.m.

Is there anything one cannot do out of love; your perseverance and courage have made this exceptional work possible – for so many years. This is exemplary, and on account of it you are now, and will be in the future, one of the leading figures in our Mission. Let us reiterate how important these messages are, constituting a very precious asset that will remain for all our abhyasis. They add to our fundamental teachings many important aspects worth considering in a spiritual approach such as ours. Life is not easy for anyone; implementing this practice on a daily basis reflects a profound inclination and a true aspiration towards the Divine. We assure the best outcome for everyone; times are difficult and, in the long term, they are likely to become considerably more complicated. What must be will be. One thing is certain, our committed abhyasis are acquiring very substantial assets. It can take a long time to understand what is essential. Everything passes on Earth, ultimately leaving very little trace; this aspect is to be considered. What is acquired spiritually is different and remains a major asset for the subsequent steps and for the evolution of the soul – this possession is very precious. We are given the ability to appreciate what this extraordinary practice brings to all our abhyasis. Although the results can hardly be measured in human terms, they are more than satisfactory. May all realise it and truly appreciate the benefits of an approach such as this. Let all advance with the joy of possessing such an asset and sufficient open-mindedness to climb this sacred mountain,

blessed by the gods. The incarnate Master and the entire hierarchy of Masters ensure that everyone emerges stronger and more determined than ever to achieve the real goal.
