Whispers from The Brighter World

Thursday, April 10, 2014 – 10:00 a.m.

The source of these messages cannot simply dry up; let us continue for some time. Many of our brothers and sisters appreciate these writings, which fit in with their practice and help them in their daily lives. Repetition, the hallmark of every teaching, is very useful, and no further proof is needed on this point. We want the best for our abhyasis. Our path is distinct in many respects, and blessed and supported by the higher powers.

Knowledge will one day have to spread across the Earth – true knowledge concerning fundamental principles, and not to be restricted to a select group. This situation is perpetuated on Earth; it is high time to consider some open-mindedness on a few essential elements. The obscurantism that has been maintained for millennia will one day have to be transformed in a positive direction for a constructive evolution of humanity. Times are changing – these facts are going to be confirmed more and more. The elements will take care of confusing humans and then lead them to a more accurate understanding of phenomena. Let us continue to work towards a true open-mindedness, fostering this spiritual quest by which all our brothers and sisters embellish their daily lives.

There is much to do to lead humans to the higher reality. Time does its work, and it will achieve the best for this entire Mission – so special in its effects, not currently

assessed at their true worth. Everything will come in its time; let life do its part in what it has divinely orchestrated.

Blessings to all.

Babuji
