Whispers from The Brighter World

Saturday, April 19, 2014 — 10:00 a.m.

In the future, many things will change here below; an unprecedented transformation will occur. The transmission of divine energy will be different and very active in its manifestation. This world will advance significantly, and hopefully it will yield another level in the evolution of consciousness. Many changes will occur; everything is pre-planned in this sense, and so has it always been. Life on Earth must adapt to an established order prevailing in the universe. Nothing happens without reason, and the order of things must be fulfilled. The Earth is only a link in an immense chain where divine laws are constantly operating. Everything is deliberate and planned for, and will happen in its own time. The human being only follows the movement of life — nothing more; he must put up with what life holds.

"Spirituality is and will remain an essential aspect in this world. It will prevail in the future as an absolute necessity. The vibrations will then be different and effective in their primary purpose of bringing a favourable vibration here below — one that will be very desirable for everyone. May these times come soon and provide humans with what they are lacking today, so that they may thrive harmoniously in a satisfactory vibrational environment. Our abhyasis are longing to know and to be given a few details on what the future holds. Why would we not provide this information, insofar as some can be given, to meet a justifiable request? May the best happen for everyone and for the good of suffering humanity."
