Letting this very special love emerge inwardly is an indication of a deep aspiration for the Divine. It is a grace to give this love its rightful place and to foster a real development through an appropriate approach such as the one we propose. Opportunities have always been given to human beings who possess these special abilities. From time immemorial, many of them have left their mark on this world. They have set examples for brave hearts ready to draw inspiration from them.

"Following a spiritual Master is the best guarantee that what is essential will emerge in one who is ready to embark on this way of the heart. Finding a suitable way and doing one's best through a steadfast commitment can transform a person's life. Life thus takes on a completely new and profound meaning that has a lasting effect. It opens up the path and allows for the best results.

"The heart has its reasons, which are exquisite when the heart is effectively focused on the definitive goal: communion with the Ultimate. Everyone has their personal dispositions. A spiritual Master provides his full assistance; it consists in guiding the aspirant and helping him or her advance as best as possible.

"This love is not in vain — far from it. It is the supreme force that connects the soul of the seeker to the divine source. Nothing is superfluous in such a process; it bears the most delectable fruit. It is a delight to see the progress of all our abhyasis. All are carried, and each one is advancing at his or her own pace, with visible results. We are repeating ourselves, but this constitutes a major advancement in this world, and it is just beginning. This is how it goes."
