Whispers from The Brighter World

Sunday, June 1, 2014 – 10:00 a.m.

The history of the world conceals many mysteries. Humans often alter it at their convenience, denying a more compelling truth. May our Mission never experience the same in the future. What is essential will remain; that is what matters, even if some facts are slightly distorted. Such is humanity; as for divine laws, there is no transgressing: what must be will be, despite the views of naysayers.

A spiritual way is not given in vain; it is in line with present times and will bring exactly what will be needed in the future. Very long cycles lead to new teachings more suited to present reality. Humans evolve in their beliefs, and especially in their perceptions of life in all its subtlety. Humanity as it was many centuries ago would greatly surprise people of today, who have no idea of the limitations it was subject to. Today, spirituality is accessible to all; one only has to truly want it. Nothing is imposed by any ideology or cast system. Faith is enough. When the call of the heart is there, the possibilities of action are within everyone's reach. Investing oneself totally leads to results that are not very palpable but real. There lies the true success of a system. The one we advocate is very rich in effects; they will mark this time, and for a long while. Such is our constant wish, shared by the entire hierarchy of Masters. This is how it is.
