Whispers from The Brighter World

Sunday, June 8, 2014 – 10:00 a.m.

These thousands of messages have penetrated hearts much more than our abhyasis think; it is not easy to put things into perspective in this area. What is essential is the result achieved, and we are well placed to assess it.

In our way, everything contributes to the spiritual blossoming of our aspirants. All seems so simple, and yet remarkable work is being done, benefitting not only the aspirant but also his or her circle. The energy conveyed is very special. It touches hearts at will and according to the profound aspiration of human beings to open themselves to the Divine. A radiation is created; a group meditation generates a very positive energy, effective beyond the sphere of the participants. To unite with this group through the heart, when one cannot actually be present, testifies to a true call, and it is heard. Everything is very subtle in this domain where the heart is sovereign. Our way solicits the heart by means of its effects, which are beyond the reach of human understanding – there lies the power of this method. Our way benefits fully from it, more so now than ever before; such is its strength. Thus is it desired for present times, preparing beings committed to this path towards what the future world will be – a world that will have made a big step towards an undeniable evolution exceeding the current understanding of so many humans. Many mysteries are beyond them; how could it be otherwise? One thing at a time – everything happens at the appointed moment. Let us work for the good of all, today and for tomorrow.

Constant blessings.

Babuji
