Whispers from The Brighter World

Friday, June 27, 2014 – 10:00 a.m.

All these beautiful testimonies coming from many abhyasis, are they not encouraging? They urge us to continue for some time yet, to give the most and the best possible. Everything is accomplished slowly on Earth; it has a rhythm of its own, and we must adapt. Following the movement of life as a whole requires constant attention. Life manifests differently according to the levels of consciousness in the evolutionary attainment of the worlds concerned. Here on Earth, everything is relatively simple, repeating itself incessantly and producing the same results.

It is on the spiritual plane that our real action takes place. It operates according to circumstances, more specifically at favourable moments of the year. The celebrations are of great importance; this aspect should be considered very carefully in the course of a year. We would like all our abhyasis to be motivated on those blessed days which, alas, are not always observed by all with as much attention as they deserve. Meditation, preferably in a group, generates a very strong movement of a specific energy – one that reveals the effectiveness of this spiritual path, as intended in this world for present and future times. This impact is thus willed, and it will unfold in time owing to its power of action; nothing is in vain in this very special area where the effects of this work are not understood by all as they should be. Everything in its own time. A day will come

when the higher powers will manifest in all the amplitude intended for the good of all humanity, towards an unprecedented evolution.

Blessings.

Babuji
