Whispers from The Brighter World

Friday, July 18, 2014 – 10:00 a.m.

What a long way we have come with these messages! Beautiful testimonies confirm our words which, over time, will leave an imprint you cannot imagine. Nothing is done in vain in a spiritual way like this one, willed by the higher powers in these times that are full of uncertainty and all kinds of disruptions for human beings. Yes, we repeat ourselves, as this spiritual brother told you, but such is the necessity for any endeavour in this human world and far beyond – of that you can be sure. Repetition creates life in a way; without it, nothing constant and productive would be accomplished. Doesn't everything have its raison d'être! Once again this must be emphasised. The constancy of our faithful abhyasis is itself a series of repetitions – do they grow weary of it? It does not seem so; time will strengthen in them the effects of this unceasing work, renewed day by day.

The world of matter has its requirements, and others have theirs as well, which characterise them in many respects. A considerable work is being done on this entire planet, whose life manifestations humans cannot penetrate in their current state. Humanity is evolving within the limits of what is reasonable, one might say; perhaps one day it will be able to understand the manifestation of life in the universe.

May human beings focus on themselves, on their own evolution, which is far more decisive for them than having a greater knowledge of creation as a whole. Everything in its time; a day will come for true knowledge, one that does not deceive like this world of

illusion constantly does. Advancing spiritually opens the real doors of knowledge; so it is.
