Whispers from The Brighter World

Thursday, 24 July 2014 — 5:45 P.M.

Not respecting our choice is a serious matter; here, we are better placed than anyone to appreciate and assess a situation. As regards the succession of our dear and great beloved son, who has the right to consider that it's wrong? Criticisms are inappropriate and generate a negative climate, even more so for those who create it and do not respect our choice. It is saddening to see the same situations occurring again, especially when you consider the consequences for those who create this unfortunate state of affairs; precedents should be borne in mind. May the beings concerned come to their senses and respect the hierarchy and the current Master in his timeless and spiritual nature, away from any human baseness. May these brothers and sisters who are going astray in these troubled times return to reason and respect as is proper the decisions of the hierarchy — decisions that are divinely inspired for the good of these individuals and especially for the good of the whole Mission.

"The Mission is going through a delicate moment in regard to the health of our dear and great beloved son. Breaking the rules is a serious breach, the consequences of which would be very unfortunate for the people concerned. May all become aware of the seriousness of the situation and respect our choices; they are sound, as will be revealed in the future. This is how it goes; it is up to everyone to see and assess the situation far from the human meanness that is inevitable in this world. May love suffuse people's hearts and purify them as appropriate. Our unceasing blessings. "
