Whispers from The Brighter World

Wednesday, July 30, 2014 — 10:00 a.m.

A vibration of love rising above a material world — a world that is more troubled than ever in these times of every sort of excess — this vibration is the subtle essence of our spiritual way called Sahaj Marg, a path that is out of the ordinary as far as its practice is concerned. It adapts to modern life by giving everyone the opportunity to act as they see fit, beyond the large gatherings. These gatherings are essential as are the group meditations, allowing the unification of hearts into a vast liberating movement. Life is one and indivisible; the egregore of our way goes beyond the boundaries of the material world, operating on other levels where it also grows in its redeeming action. From our position, we can accurately assess what exists. This movement will increasingly bear delectable fruit for the soul, for the incarnate being. Finding 'the way' is not always easy, as other experiences are needed to better appreciate that which this way provides. Imposing limits on oneself, devoting a little time to that which determines the continuation of human evolution, is of utmost importance. We do see people's hearts, their progress towards the Ultimate, and the journey they have traveled in spite of the great difficulties which some of them have faced on the material plane. All successes are beautiful and bring much benefit to the Earth and elsewhere, far beyond human comprehension. The divine power is infinite; it operates as it sees fit, far from human preconceptions and any form of social status. The essence of the soul is divine, and its path is determined in advance. When it finds the way, mercy is granted, and a journey to the Ultimate can then start — a journey that does not disappoint. May all our abhyasis be fully motivated and achieve the goal according to our most fervent wishes. Constant blessings."
