Whispers from The Brighter World

Saturday, August 16, 2014 – 10:00 a.m.

These messages do emanate from the chorus of the united Masters – there is no doubt about it. They are the expression of a very special energy and are given to the Mission for the good of all, fostering its expansion in the world of human beings. So many people are suffering, and this is only increasing in the face of the pervading negativity on the material plane. A difficult obstacle will have to be overcome to arrive at a more just harmony on this Earth. This planet is so generous, and graced with many assets. Do humans truly realise it? It does not seem so, since there are many who do not respect it.

Better times will come after many changes, through which a real awakening will occur here below. It takes some time for understanding to truly take hold. Spiritual evolution is necessary in this area, as in many others where it is essential. An approach like the one proposed in Sahaj Marg saves the aspirant precious time. Everything is counted and subjected to the rigour of divine laws, and nothing escapes them, you can be sure. In this way a more just humanity is gradually being built, one that is more refined than that of the past. An enormous work remains to be done, and it will be done. Humanity of the future will become more responsible and enlightened on what is

essential – and this, after many ups and downs. We wish the best to all, endowed with our constant blessings.
