Whispers from The Brighter World

Wednesday, September 17, 2014 — 10:00 a.m.

Overcome your disappointment. So many messages are known to our brothers and sisters, and these help them every day. According to their respective personal aspirations, individuals find in the messages that which satisfies them.

"Yes, many changes will occur on this Earth, so why not talk about it? Our abhyasis are sufficiently mature and informed to justify our addressing, when necessary, a few matters that concern them. We will revert to this later. Changes are also in the making in other spiritual paths that have long since left their mark in the world. Humanity is at a pivotal point in its evolution. Since the dawn of time, the history of the world has been fraught with multiple changes, some of which have been large in scale.

"Nothing ever stays the same. Matter in its tiniest particles is constantly evolving. Such is the law of life which, in all its intensity, far exceeds human understanding. In many areas, human beings have reached a level of knowledge that is quite remarkable, but they still have much more to discover. Everything happens very slowly here below, at a pace desired by the higher powers whose laws are unknown to humans. Those who are most 'learned' are limited to the knowledge that is currently available. A big step will soon be made, but that is not to say it will happen tomorrow. May all our brothers and sisters focus on their own lives and their personal evolution, thus perfecting that which already exists through the current approach. To all, the best."
