Whispers from The Brighter World

Thursday, September 25, 2014 – 10:00 a.m.

Detach yourself from the useless, forget the current torments, in order to receive our energies – those that delight your soul and produce these exceptional messages. Are our abhyasi brothers and sisters truly aware of their importance? They are unique in number and vibratory intensity. The beings of the future will have such a sensitivity that they will be able to fully capture the very special charge that characterises them.

The subtle points within a human being receive that energy and release it in their own manner. All of this may sound strange, but it is so, let us say.

These writings are not given in vain, you can be sure. The history of this world is made up of many testimonies about the past, relating events that have made it what it is today, in many fields. Here, we are in a special register. We express ourselves to leave a contribution to this Mission already rich with many benefits and experiences forming the foundation of this new approach to the Divine. Its progression into hearts in such a short time is unparalleled; history will retain its distinctive features and above all its many benefits. An apparent simplicity hides very positive effects, we repeat. It is up to each one to understand this and to seize this opportunity, to advance against all odds.

May all be enlightened and strengthened in this quest for the Divine.

Babuji
