Whispers from The Brighter World

Sunday, September 28, 2014 – 10:00 a.m.

Relax, and let your heart express what we inspire in it, for the good of all our brothers and sisters. The turmoil in this world disturbs human beings, who are more and more destabilised by all these harmful conditions, increasing here below at an alarming rate. The refuge of faith is a sacred asset for them; opportunities are offered to them to overcome this negativity and to interiorise themselves, for good reasons. Love, at this level, touches the most subtle part of the being – it strengthens it and brings it to a satisfactory vibratory state. The complexity of the human being is beyond human understanding. Let us repeat that science today is still unable to grasp all these subtleties, far beyond the material realm. Human beings of the future will benefit from many resources, allowing them a more accurate approach to phenomena. Slowness is characteristic of the present era, but doesn't everything have its raison d'être! We cannot go beyond the conventional, there is currently so much to do to motivate humans to engage in a real spiritual process freeing them from what, here below, hinders their personal evolution.

Sahaj Marg is advancing slowly but surely in winning over hearts – this approach is good and highly productive. One day the divine goal will be attained for most of them, which will contribute to the transformation of this world, in some measure. So much remains to be done, our goal is to achieve the best. The egregore of the Mission is growing, and many beautiful souls contribute to it.

Blessings to all.

Babuji
