Whispers from The Brighter World

Wednesday, December 24, 2014 – 10:00 a.m.

Now that he has completed his Earthly odyssey, our beloved and great son must regain all necessary strength to take on the mission that is reserved for him here. All of us, in our respective missions, are doing our best to meet the expectations of the Ultimate Power that governs the various worlds – so numerous that human beings cannot imagine what they represent. Knowledge on Earth is still very limited, this must be admitted in all humility; we too have yet some things to discover, but that is not what matters – our aim is specifically to help humanity on its painful journey, such as it is today. The spiritual aspect should be considered as a priority. Great discoveries are important, and this century will be working on them, but human evolution is necessary and therefore programmed in this way. True discovery takes place within oneself, where real life builds itself, the life of the immortal soul endowed with true greatness – one that is discovered from life to life when those lives are focused on the meaning of this human evolution.

Our way exists by divine grace, precisely to bring what is suitable to human beings in need. There will be an increasing number of them – such are the divine purposes – and we are happy to be able to meet the growing needs of a humanity suffering since the dawn of time. The cycle of human evolution is slow, but it is based on solid truths with regard to the teachings delivered in Sahaj Marg. This path will remain, for a very long time, the hallmark of an unprecedented process. The future will confirm these

words, and abhyasis will be able to judge for themselves. Humanity has reached a point where everything must change, lest it should perish in an unspeakable quagmire. Let us all work towards the good in all humility, without believing that we are the only ones working in the right direction, as many are already doing so in their respective disciplines. Here, all is well. You have our constant blessings.
