Whispers from The Brighter World

Monday, January 19, 2015 — 10:00 a.m.

Life goes on; regardless of what may happen on Earth, that which is essential is preserved. Many people still do not have this notion of the reality of their Earthly journey and the fact that their existence continues elsewhere, on other planes of consciousness where they have to proceed in line with that which already exists. The process followed in Sahaj Marg allows everyone to become refined, shedding unnecessary aspects wherever possible. We help our abhyasis in the best possible manner. Nothing is ever simple, but this blessed seed sown in hearts is bearing fruit, the importance of which we cannot assess herein. Love is the vibration, the subtle energy, that allows developing abhyasis to transform their being to an extent that they themselves are unable to evaluate. Blessed are those who seize such an opportunity. They gain valuable time, to an extent they cannot grasp.

"Spiritual Masters, like those who work in our way of Sahaj Marg, are endowed with powers having a special characteristic — they operate in the silence of the heart, and in an effective manner. No human being can truly measure it. Here, we are able to do so, and the results are confirmed more and more by the growing scope of the Mission on Earth. Some beings are more receptive, but all ultimately benefit from this extraordinary transmission that is granted by the higher powers. It is up to each one to dedicate themselves and truly realise the grace that is associated with this commitment over the long term. Each step is important. The goal is in sight, and everyone should do their best to achieve it."
