Beloved Master
Revered Babuji Maharaj

Whispers from The Brighter World

Monday, January 19, 2015 – 10:00 a.m.

Life goes on; regardless of what may happen on Earth, what is essential is preserved. Many people still do not have this notion of reality, of their passage here below and the continuity of their existence elsewhere, on other planes of consciousness, where they have to proceed in line with what already exists. This process, followed on the path of Sahaj Marg, allows everyone to refine themselves, to shed what is unnecessary wherever possible. We help our abhyasis in the best possible manner – nothing is ever simple, but this blessed seed sown in hearts is bearing fruit whose full importance we can assess here. Love is the vibration, the subtle energy, that allows abhyasis, as they develop, to transform their being in a way that they themselves cannot evaluate. Blessed are those who seize such an opportunity. They gain precious time, whose extent they cannot grasp.

The powers of a spiritual Master, like those who work in our Sahaj Marg path, have a specificity – that of acting in the silence of the heart, and in an effective manner. No human being can truly measure it. Here, we are able to do so, and the results are confirmed more and more by the growing amplitude of this Mission on Earth. Some beings are more receptive, but ultimately all benefit from this extraordinary transmission, such as is granted by the higher powers. It is up to one and all to dedicate themselves and truly realise the grace that is associated with this commitment, over

the long term. Each step has its importance, the goal to be reached is appearing on the horizon, and everyone should do their best to achieve it.
