Whispers from The Brighter World

Sunday, February 1, 2015 — 10:00 a.m.

All these beautiful comments about the messages, these testimonies emanating from fervent abhyasis, are touching; you receive them with happiness, and this makes us happy. These writings are not given in vain, you can be sure. They are a valuable asset for our Mission, and their effects will be measured over time. The association of Masters, who have represented the Mission here below, creates a force that operates for the welfare of this extraordinary way of the heart. Everyone receives according to their call; we cannot force anything, only meet an expectation, a need to grow spiritually — as far as possible under the current state of affairs.

"Many ardent hearts are turning to us. They are in need, and we respond to them in our own manner. Nothing happens in vain; everything is recorded, and this represents the attainment of each one. An incarnation has multiple aspects, none of which is ignored. It shapes the true personality of our brothers and sisters involved in this vast mystical momentum that will defy time. Only this momentum will allow for an assessment of what this path truly represents at this stage in human evolution. The subtlety of this method is not really understood, but this understanding will come.

"We wish real commitment to one and all, along with the corresponding results. We are confident in the future of the Mission; so many good people are committed to serving it, and they receive accordingly. Rest assured that everything has its raison d'être and nothing is in vain.

"The best to all, from the united Masters."
