Whispers from The Brighter World

Sunday, February 22, 2015 — 10:00 a.m.

Time will give these messages their full importance: they will become the hallmark of Sahaj Marg, as wished by the Masters and supported by the higher authorities. They will become a valuable asset for this spiritual path. Big changes are coming, and though they are unimaginable today, they will occur, bringing humanity back to a state of increased wisdom and respect for all of creation; it is time to consider this aspect. Dramatic reactions will occur, restoring order in this mad world that totally neglects the reality of divine power in its various aspects. Human beings must remain within the limits of what is currently possible; when the time comes for a complete mutation, things will unfold at the desired pace, in keeping with an order that is necessary for the welfare of all creation.

"May our abhyasis understand the need to focus on what is essential. Only spirituality will help people emerge from the chaos sparked by major upheavals that are required for global balance. May our brothers and sisters rest assured that when these times come, they will hold onto their personal attainment which will be decisive for their onward journey.

"Sahaj Marg as it is today has been purposefully designed in this manner. Its benefits will extend across the Earth to provide people with the guidance necessary for their spiritual growth. One day, after much turmoil, this world will revert to wisdom. It is far from that state today, as the effects of this turmoil have become disturbing to the multitude. May our abhyasis move towards the goal with determination — we will help them.

"Blessings."
