Whispers from The Brighter World

Thursday, March 19, 2015 — 9:30 a.m.

The heart determines all life and holds secrets of which the human being has no idea. Everything is decided in this sacred place, since destiny etches its law therein — a law that has been decreed by the Divine. Our action is applied to it, operating on specific points that have until now been generally ignored. This action supports spiritual growth. So many mysteries remain. Being so very fixed on present-day life and its exaggerated materialism, are human beings ready to truly progress? Beautiful souls are advancing; they know how to take advantage of that which is offered them in the field of knowledge. Many of our abhyasis would like to go further into such knowledge, but certain limits are imposed; diligent practice and definite commitment ensure a satisfactory spiritual progress.

"Each one progresses at his or her own pace, although in some cases it is possible to speed up the process somewhat. Our way attracts beings who thirst for the Divine. They desire a significant advancement, and this usually comes about. Although simple in appearance, this method produces good results when it is appropriately received. We are gradually advancing on this path, where knowledge is broadening in such a way that it can be grasped in this present stage of human evolution. It is up to each one to focus on what is essential and to open his or her heart to our continuous action. Only the abhyasi's call determines the intensity of our action. To all, we wish the most favourable advancement possible.

"Special blessings."
