Whispers from The Brighter World

Tuesday, March 31, 2015 – 10:00 a.m.

The Masters of the past, united with one another, are looking down upon the great work that is being erected in Hyderabad. It is there that the high place of Sahaj Marg will be, where great things will be accomplished under the impetus of the current Master, Kamlesh Patel. He has the right stature to carry out such a project. We expect much from him for its realisation. It will carry his personal stamp, according to our wishes. Nothing is too beautiful to celebrate the greatness of this spiritual path as it will be perceived in the future. Precedents have thus left their mark on this world; why would Sahaj Marg not do the same in its own context! History repeats itself – to each era, its own.

Great structures around the world tell the story of humankind, and in various forms; this history continues, and the Sahaj Marg Mission has its place in it, much more than abhyasis of today may think. It always takes time for events to truly make their mark on history. Each human being is advancing in the discovery of his or her own history – all are progressing in their own way, thus contributing to human evolution as a whole. Yes, that site will be visited and appreciated; it will be highly charged – this, by divine grace. We can only rejoice in it and encourage our dear and great son Kamlesh to take in hand, one might say, the achievement of this great work, blessed by all of us here.

May the best take place for this entire Mission, desired and created by the higher powers.

This is how it is.

Babuji
