Whispers from The Brighter World

Sunday, April 5, 2015 — 10:00 a.m.

The number of these messages is impressive; in fact, it is unprecedented in history. This is worth stressing, and only time will give this matter its rightful place. The hierarchy of Masters is very attentive to our dear Kamlesh's start [as a Master]; it is very promising. He has begun his role with a certain ease and will carry on with his work brilliantly. We expect a lot from him, and he will respond accordingly.

"The Mission is at a turning point in its history. It will gradually adapt to the circumstances of the times and the growing number of abhyasis. The Mission of the future will have to move at its own pace, taking into account the general evolution. Big changes will occur in this world; this should in no way alter the essence of Sahaj Marg, although it is advisable to adapt to the present by judiciously modifying some of the essential rules of the practice.

"There is still so much to do to bring the human being to a more accurate perception of phenomena. A collective awareness will open up new perspectives and allow for real progress towards knowledge — a knowledge that still keeps its secrets so well. Human evolution will enable real progress at all levels. So many misconceptions and misinterpretations of the facts have been maintained here below; such ignorance should be overcome. May our actions modestly contribute to this — such is our wish.

"To all, we wish the best in moving forward, in accordance with their personal aspirations. We are seeing to it."
