Whispers from The Brighter World

Monday, April 6, 2015 — 10:00 a.m.

Many opportunities will open up for the Mission of Sahaj Marg. Time will strengthen the existing foundation and spread its action worldwide. Humanity as a whole aspires to grow, to develop at all levels; it has the means to progress. Spirituality is still far from being the goal of many individuals who are caught up in the fluctuations of material life. The latter hides fundamental aspects of spirituality for the wrong reasons — this is not new. The way of Sahaj Marg is not demanding. It allows a balanced life without imposing undue constraints and targets that which is essential. The heart is its centre of interest, concealing treasures not yet recognised and guarding its secrets well. It is better that way in the current era where so many disturbances disrupt energies that remain vital in this specific point, namely the heart.

"The heart is the central axis of our work. It produces results that are not easily assessed, but they exist, you can be sure. In ancient times, far back in the past, this method was already known and sought after by the elite in search of truth on this essential aspect of spiritual evolution. It is crucial for humans, who have a profound aspiration for knowledge even if they are not necessarily aware of it. One day, the opportunity arises whereby they can go further and more deeply into a method, a way to elevate themselves that seems simple and yet is actually effective. Their commitment is not in vain. The day will come when they can fully assess its effects. The winning of hearts is redeeming; the divine goal is the objective. To all, every success. Such is our sacred wish."
