Whispers from The Brighter World

Monday, April 27, 2015 — 10:00 a.m.

The sacred temple of Hyderabad will become the crowning place of our Mission, a point on Earth blessed by the gods. It will make a lasting mark on the history of Sahaj Marg. Everything will take its place as planned; this site will be charged more and more with our energies. Major events will unfold there, and we can only encourage our brothers and sisters to give it their full attention. It materialises our wishes for this great spiritual Mission which will defy time, and we are happy for this.

"May all our brothers and sisters become aware of what is offered to them spiritually, thus strengthening this sacred egregore that is so dear to us. Do all these beings, our brother and sister abhyasis, realise the importance of this way of the heart? This is not possible now; the future will grant it a special place. Evolution on Earth will bring to light the benefits of its action which will reach its full magnitude in the future. All attention will be given to the vibratory movement that conditions all life on Earth. This aspect is not yet valued as it should be — all in good time. Everything evolves very slowly on this planet, following the rhythm of its own pulse. All this seems abstract. Life follows its own course, as do the lives of our abhyasis. Over time, we can measure the effects of this system on the brothers and sisters who are following its process — it is amazing, and it makes us happy."

"Blessings to all."
