Whispers from The Brighter World

Wednesday, 29 April 2015 – 10:00 p.m..

Birthdays are highlights in our Mission; they specifically bind together the hearts in this quest for the Divine – a quest in which every step counts, strengthening the abhyasi in his or her spiritual advancement according to our wishes. Four Masters, four very special days – in this way, the cycle is completed and the ritual for such circumstances is performed. Fervour uplifts the soul, and in such moments, it finds its full reason for being. It is good and very comforting to see these large gatherings that show everyone's determination to give the best of themselves. In these circumstances, the symbol of our way can exhibit all its resources through an approach that is more sensitive to the Divine. Such special moments in a year are given to the Mission: these grand seminars will forever have a strong influence on this unique path. This year, this gathering takes on an even greater importance: it unites hearts in a state of fervour. Each of our abhyasis experiences this in his or her own manner; what matters is the thought, the force of action generated by this kind of love up to the far reaches of what is imaginable.

"To all our brothers and sisters, we wish the best, the intensity and depth of life, such as leads to the elevation of the being. Very special blessings to all – you are carried by the chorus of united Masters. May these days remain outstanding ones for each of you."
