Whispers from The Brighter World

Thursday, May 7, 2015 – 8:30 a.m.

Take full advantage of the joy this visit provides. Spare yourself – this is imperative – and let your heart be nourished by these moments of grace. This Montpellier ashram that is so dear to you will also benefit from the presence of the Master; this is a special event for all our brothers and sisters and for this blessed place in particular. In the future, its history will take on more importance owing to some of its unique characteristics. Everything in its time. Each step taken marks the present and the future, when such special places will become reference points in our Mission. Highly charged and vibrant ashrams already exist, or are being built in the world, and they will mark the future of this path. Some of their histories will stand out one day in the broader context of the Sahaj Marg Mission. A succession of Masters is already giving them strong support and a structure that will defy time, thus providing a priceless benefit to beings committed to this journey.

Our abhyasis can rejoice; they take part in this unusual movement that helps them more than they think in this uncommon commitment. Nothing is lost in such an approach, contrary to most of life's activities. We want the best for all and the building of a better world, for which spirituality is a major asset. May it one day be understood in this sense and help the greatest number.

May all be supported and guided appropriately. Endless blessings.

Babuji
