Whispers from The Brighter World

Tuesday, May 12, 2015 — 10:00 a.m.

This visit of our dear Kamlesh has filled your heart and the hearts of many other abhyasis. His mission is beginning, and it will unfold over time in an impressive way that will meet our expectations. We support him with great love; his duty is already heavy and it will take on greater scope. He will be able to manage it and organise himself accordingly. One can already feel the beginnings of a future that will be different on many levels; sensitive beings who are open to these subtle vibrations can perceive them. The human being is passing through on this Earth. A person's role is minor and yet his or her wisdom fits perfectly into the divine and multi-faceted scheme whose effects have an impact on the whole of humanity.

"A spiritual approach like the one we propose goes to the essence. Far from imposed rituals, our way is expanding across the world, simply but effectively. Every person makes this journey towards the ultimate goal their own. Practising correctly through personal and steadfast commitment opens doors of a subtle nature, resulting in significant effects on the spiritual heart that hides its treasures so well. It keeps its mystery perfectly, outside the realm of scientific discoveries. The time for the fulfilment of the sovereign Spirit has not yet come; it is being prepared in its own manner. This is how it goes. From life to life, a treasure is being accumulated whose richness will surprise [people] one day. May grace touch the hearts of all our brothers and sisters. They are not working in vain; may they be convinced of that.

"Blessings to all."
