Whispers from The Brighter World

Saturday, May 16, 2015 — 10:00 a.m.

This seminar is beneficial for its participants, but not only for them; its action leaves an imprint on the locations where it occurs and benefits other persons who are sufficiently receptive to its very special energy. In the current era, humanity is looking for its true identity, its potential on the spiritual level; important work remains to be done to raise the level of consciousness. Everything is slow here below, as the laws cannot be circumvented. Even so, a real process is currently going on and the Mission benefits from it. The Mission is forging ahead. All of us here support our dear Kamlesh in his efforts to promote the expansion of this system that is so special and suitable for the new era. An unfolding of Sahaj Marg should be based on unity and trust in the Master who is vested with our powers. Nothing is done without this unbreakable bond — a unity capable of weaving the sacred fabric in which the divine will is expressed.

"Our abhyasis have found their way. Many are actually aware of this and are fully committed. For them, this incarnation is an opportunity, a blessing which they enjoy now but which also opens doors onto the future. May they all reconsider their commitment and do their best to fully involve themselves in this unprecedented journey; they will not regret it. These messages are intended to help our brothers and sisters; it's up to them to ensure that they make the most of this help, supported by our ceaseless action."
