Whispers from The Brighter World

Thursday, June 4, 2015 – 10:00 a.m.

Sahaj Marg is progressing in people's hearts in its own manner, with utmost subtlety since it acts on the psychic centres – key points that are decisive in human evolution. This aspect of life is so little known, and yet it is important in the development of spirituality. Our action relates to it and generally produces significant results. The progression of a being in this area passes through subtle stages that are important in the journey of our aspirants. These things are not really emphasised; one day they will have to be, but let us content ourselves with advancing all abhyasis to the desired level. Some abhyasis distinguish themselves and very quickly pass through the stage of normalcy – that is to say, the most common level, and yet one that is quite satisfactory.

The purpose of any incarnation is to grow, to advance in the knowledge of oneself and of the multiple aspects of the divine manifestation in all things. How many human beings care about these matters? It has always been so. Everything happens in its own time when events converge to foster a spiritual process. Our way is easy to access, you might say, yet it is effective, offering the abhyasi a productive spiritual journey. This world is supposed to be progressing as a whole in order to reach another level of consciousness; this is happening slowly due to the lack of commitment in this direction by the majority of people. Nothing can be forced; only the call of the heart allows

for a satisfactory opening towards this aspect of life. May all be strengthened and enlightened at this level.

Blessings to all.

Babuji
