Whispers from The Brighter World

Sunday, June 28, 2015 – 10:00 a.m.

Let yourself be carried on the wings of love, that love which nourishes you every day through these extraordinary contacts. Here, mediumship is not enough; very special ties bind us and form a sacred chain unlike any other. This is how it is, dear scribe, thus you will not be replaced. Do not feel embarrassed. The pure in heart feel the truth and accept what is. These messages exist, is that not the most important thing! They help people every day. Enough evidence about this fact – an important one for our Mission – has been given to you, and over a long period of time. These writings will defy time; being received and kept in various places around the world, they will constitute a precious asset in the future. Current times do not always give due importance to occurrences that appear trivial. What is to be will be; given the importance of the messages in our Mission, the needful will be done to preserve them appropriately. Spirituality will save the world, allowing it to keep the memory of important things; so has it always been in the past.

The way of Sahaj Marg is given to human beings at a time that is not particularly open to spirituality, and yet so many beautiful souls are coming towards us; while they are not really aware of their potential, they quickly understand that it is in their interest to make the necessary effort to reach their highest potential. We are working accordingly, with happiness. Our abhyasis are attended and carried according to their wishes, and they will go very far.

So it is.

Babuji
