Whispers from The Brighter World

Wednesday, July 8, 2015 — 10:00 a.m.

These messages result from an extraordinary heart connection; this accounts for their duration and the vibration that carries them. Being gifted in this manner would not be enough — love is crucial in such an extraordinary context, one in which we have been expressing ourselves for so many years for the good of our abhyasis. Doesn't everything have its raison d'être? Here, as elsewhere, we try to do our best for the progress of all. This path of Sahaj Marg will have more and more impact in the future, and the call of the heart will grow stronger in this direction; we can only welcome this and ensure that many elements reinforce the appeal of such an approach. The human being of the future will feel an even greater need to escape from materiality, to take refuge within, in the holy place where the fusion with the Ultimate is the culmination of such an approach. In this, nothing is done in vain, you can be sure. Everything is simple in appearance, and yet winning over that sacred space and uniting with the Divine is the essential purpose of an incarnation; understanding this is a blessing, and acting accordingly shows great wisdom.

"Everything takes place in its own time when the call is great. We are attentive to each of our brothers and sisters; the number of aspirants in no way hinders anyone from receiving benefits. The work of an incarnate Master is valuable beyond human assessment; you all cannot imagine its scope. The fourth Master of the Mission, our successor, holds our united powers — the best and the most effective possible. Everything was thus planned for the achievement of this unparalleled work; unity is strength, as the saying goes, and it operates every day for the good of all and for the best possible outcome, under our blessings."
