Whispers from The Brighter World

Friday, July 10, 2015 — 10:00 a.m.

The India of the future will be surprising in many ways; life will be very different from what it is today — time will confirm this statement. Our way is preparing that which must come, as spirituality will take on a wider scope for the good of all. We do not readily discuss such issues, and yet all changes that lie ahead are unavoidable and will be decisive for human evolution. The new Master of this Mission, our beloved Kamlesh, will witness a certain number of these changes; not only will he be able to face up to them, but he will also readily adapt to situations and draw the best from them for the benefit of our Mission.

"All should be reassured — everything is for the best; what must be will be, for the good of all our aspirants and hence the whole human race. Following a spiritual path provides reference points, creating a space that is conducive to the elevation of the soul and offering protection from certain harmful vibrations. Our practice does not perform conspicuous miracles, but it operates for the welfare of all — much more than it may seem. It is important to focus on the present; this prepares the future to which humans will have to adapt, as has always been the case in this world. This is how general evolution goes; the planet Earth is not the only one compelled to adjust itself. We are not there yet, all should rest assured; very few of them will see these big changes. Everything evolves very slowly here below. The whole of creation is carried by the Divine; whether the human being accepts it or not, this is how it is."
