Whispers from The Brighter World

Thursday, July 23, 2015 – 10:00 a.m.

The birth anniversaries of the Masters are very important moments in our Mission. These truly special days are the vectors of a specific transmission capable of strongly touching the sensitive points of the aspirant. The synergy of these different points of emission creates a very subtle force effective in its action. Many of our brothers and sisters feel they are in osmosis with us, involved as they are in this unusual process that fosters each one's receptivity. It is not easy to understand, or even to explain, all this action involving the sensitive points of the being. What matters is to surrender oneself to this uncommon action and to set aside, during these blessed days, enough time and space to become one with this very special vibration capable of accomplishing such beautiful things.

Henceforth, four blessed days in a year will gladden the hearts of our fervent aspirants, when we grant them all possible attention. We take advantage of such special moments to transmit even more the best possible in such circumstances. Rest assured, everything has a purpose. These special days must always be honoured – out of respect and love not only for the Masters, but also for the abhyasis, who receive much more than they can perceive. Such are the mysteries of spiritual life. It deserves all possible attention as well as a sincere and constant commitment.

Very special blessings.

Babuji
