Whispers from The Brighter World

Wednesday, July 29, 2015 – 10:00 a.m.

Everything lives, everything moves – on Earth and beyond – in this universe so complex that human beings cannot comprehend it. Do they even truly know themselves? It does not seem so, contrary to what they believe. Humanity's destiny will bring about many transformations; it has always been so, since the dawn of time. An immutable world without discoveries, without surprises, would not spur the human being to seek to advance in knowledge. The movement of life keeps its mysteries well; its complexity intrigues humans and allows them to advance to the best of their ability. The most important aspect – namely, spirituality – is far too often ignored. True spirituality, that which lifts the human being towards constructive knowledge, will one day have to prevail in this world. Within each being is that source, whose effects are divine when it is called upon appropriately – namely, without certain attributes imposed for erroneous reasons. Humans are the bearers of the Divine, this unparalleled source where they can quench their thirst as they please, while complying of course with divine laws.

Sahaj Marg is advancing in this direction. It is not sectarian; it aims to develop in each person the capabilities that are well hidden in all human beings. The Divine dwells in each of them; in them lies the wonder. A person holds within each cell that parcel of divine energy capable of producing the best, when it is recognised as such. Following a path capable of developing this ability to unite with the Divine is an indescribable

blessing. May this way of Sahaj Marg never cease to progress here below in order to help the seeker find the ineffable peace within, under the guidance of a chosen Master, as is still necessary in the current era.

To all our brothers and sisters, we wish the best that can be, and total success.
